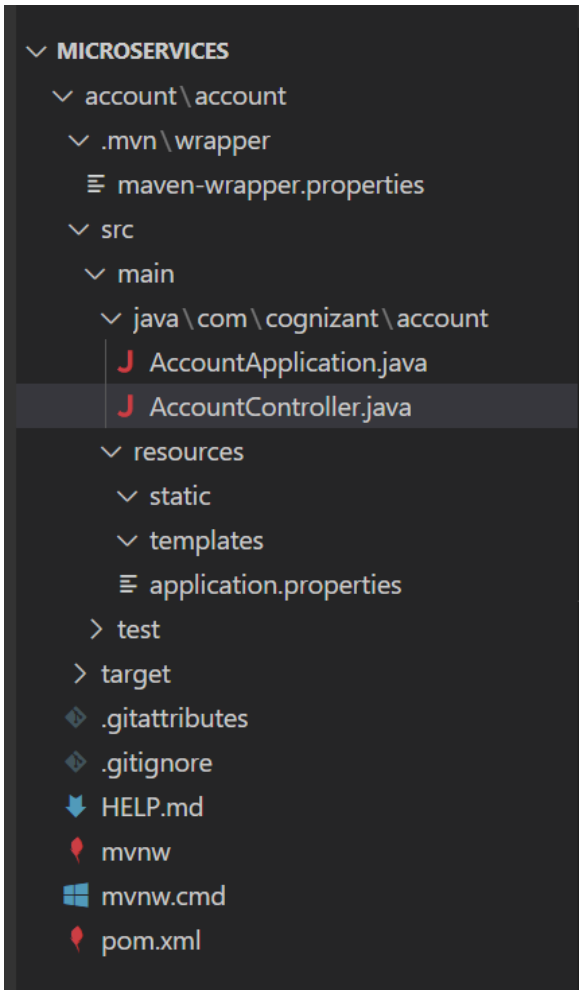
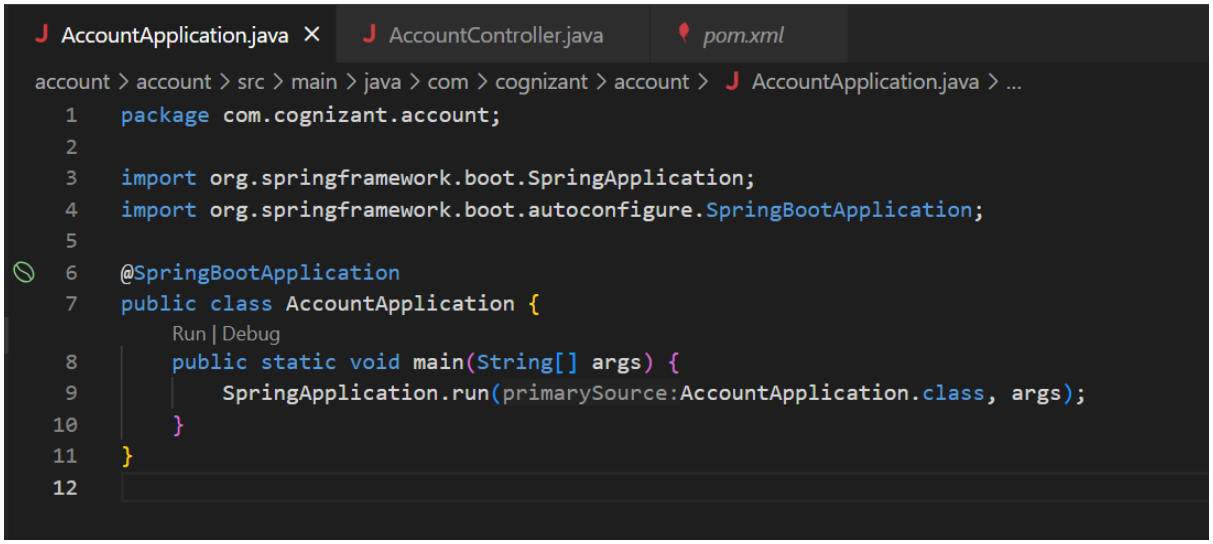
WEEK 5

Creating Microservices for account and loan

File structure:



AccountApplication.java:



AccountController.java

AccountApplication.java | AccountController.java | pom.xml

account > account > src > main > java > com > cognizant > account > AccountController.java > ...

```java
package com.cognizant.account;

import org.springframework.web.bind.annotation.*;

import java.util.Map;

@RestController
@RequestMapping("/accounts")
public class AccountController {

    @GetMapping("/{number}")
    public Map<String, Object> getAccount(@PathVariable String number) {
        return Map.of(
            k1:"number", number,
            k2:"type", v2:"savings",
            k3:"balance", v3:234343
        );
    }
}

```

Output:

Pretty-print

{"type":"savings","balance":234343,"number":"123456"}
